Opportunity for SURFers to Weigh In

SURFers interested in contributing to a future Sustainable Remediation Column should e-mail Betsy Collins (click [here](#)).

Current and past SURF Presidents Betsy Collins (Jacobs) and Maile Smith (GSI), respectively, contributed to the Sustainable Remediation Column in the most recent issue of *Remediation* (click [here](#)). With a question-and-answer format, the column offers readers an opportunity to gain insights from environmental professionals who have been intimately involved with the concepts and implementation of sustainable and resilient remediation. The piece has a long history with SURF, with SURFers contributing to the column when it first appeared in 2009. These commentaries are available in SURF's website library on the guidance, resources, and tools page (bottom of third column).

Dive in! Science in Service of Society

SURF member Sabine Aritz (SEA Environmental Decisions) recently published an insightful editorial entitled "Science in Service of Society: COVID-19, Climate Change, and the Future" (click [here](#)). The piece appears in the SETAC journal *Integrated Environmental Assessment and Management* where Sabine serves as the Deputy Editor.

Leading the Way: Foundation Celebrates 10 Years

Over the last decade, more and more companies have established corporate responsibility programs, perhaps spurred by the 2015 United Nations urgent call for action in the areas of people, planet, prosperity, peace, and partnership (access report [here](#)). In 2010, after evaluating how to expand their charitable giving supporting the environment, Woodard & Curran (a gold SURF sponsor) created a nonprofit foundation. The foundation engages the passion of their company community to support nonprofit organizations that protect water and environment. Since then, the Woodard & Curran Foundation has awarded nearly \$1,000,000 in grants to organizations across the U.S. like the Water Education for Latino Leaders (CA), DigDEEP (national), Sebago Clean Waters (ME), and Choctawhatchee Basin Alliance (FL). Hats off to the company for leading the way!
