

The importance and need for sustainability and resilience grows every year as increasing environmental, social, and governance (ESG) movements are taking place across many industries. SURF continues to be a pillar of sustainability and resilience, living its mission of education and collaboration to make the world a better place. SURF made great strides towards its goal in 2022:

- Hosted the International Sustainable Remediation Conference, as well as [three webinars](#)
- Developed [12 training videos](#) on two sustainable remediation tools
- Released a new [case study](#) and authored [three editorial pieces](#)
- And more!

In 2023, SURF will continue its mission, with more case studies, webinars, and their latest technical initiative focused on Environmental Justice, all working towards a world that is healthy, resilient, and improved through the remediation of degraded environmental conditions.

For more on SURF's accomplishments in 2022, check out this letter from SURF President, Betsy Collins.
