

That's A Wrap!

As we close out 2024, we reflect on another successful year for SURF. We continued to offer lots of in-person and online events for our members and the public. Our webinars were a hit! All four recordings are on our [SURF YouTube Channel](#). We had packed sessions at AEHS' West Coast and East Coast conferences and loved connecting in person during our member meetings. This year we initiated conversations with the NICOLE Foundation, the Australian Land & Groundwater Association (ALGA), and SURF-ANZ about possible collaborations. We also continued our strategic partnership with the Society of American Military Engineers (SAME).

Our dedication to promoting sustainable practices through education, collaboration, and innovation is as strong as ever. A big thank you to our sponsors, members, and Board of Trustees for your support. Happy holidays to all!

JOIN SURF

Want to be featured in our next Member Spotlights?

To participate, simply email [Nicole Tucker](mailto:Nicole.Tucker@surf.org) the following details:

- Your name, company, and a short description about yourself
- How long you've been a SURF member
- Headshot image
- Link to your LinkedIn profile
- What is your favorite part about being a SURF member?
- Why would you recommend other environmental professionals to join the SURF organization?

Your submission will be shared on SURF's social media.
