Betsy	Y	Yes Action	I had the fortunate opportunity to meet you at the Georgia Environmental Conference. I was there on behalf of my organization, YESAction (Youth's for Environmentally Sustainable Action), to learn more about environmental issues and network. We are a youth- led high school based organization spanned across the entire country. Our national team consists of more than 9 students that manage over 50 high school chapters across the country. We as a national team design initiatives that chapters implement in their local schools and communities. This past summer we hosted a week-long 10 hour Sustainability Leadership Training Program. It was a major success and we had over 90 students attend, and two guest speakers. We saw that many students recognize that we have an environmental crisis happening right now, but they don't know what they can be doing about it, and want to learn more about career paths in sustainability across the industries. Attached is our pitch deck that describes YESAction in further detail. We wanted to ask if you or your organization would be interested in collaborating with YESAction. We are looking for people to help mentor our students, resources, guest speakers, new initiative ideas, and opportunities for YESAction and our chapters. " Located near San Diego - potential for future engagement at AEHS West? Board is interested in supporting Besty will continue this conversation.
